

Name: Manan Madan

Roll No : 2018UIC3087

1.

Idea: Internet infrastructure Building Company

There is a significant growing demand for stronger and better internet throughout all of India. Although there are currently providers, there is a lack of internet speeds in the rural parts of India and even some issues with connectivity from the larger corporations. This leaves the business idea for starting an internet infrastructure in perfect light to execute.

Customers: People Living in the rural parts of India

Revenue Generation: Supplying and Planting equipment for clients like Jio, Airtel. Revenue will be generated through contacts.

2.

Idea: Last-Mile Delivery Solution Company

In India, many shipping companies are facing the problem of having extreme difficulties providing delivery services to some rural areas. This is because the road infrastructure is not developed enough, or it is just very far from everything else. With this idea, you can provide the last mile delivery solutions by setting up a warehouse on the edge of the city limits.

Customers: People living in rural areas

Revenue Generation: From Companies that are involved in shipping business like Amazon, Flipkart

3.

Idea: Compliance & Regulations Management for E-Commerce Stores

E-commerce business ideas are ready to blow-up in India due to multiple factors positively influencing the market. With this, comes a lot of compliance and regulations that need to be followed. This company would provide those solutions to other e-commerce companies so they could operate legally.

Customers: E-Commerce Companies like Amazon Flipkart

Revenue Generation: Earn money directly for providing our service.

4.

Idea: India Culture E-Commerce Niche Store

E-Commerce is growing at a substantial pace. This is mainly due to the access to cheap labor and goods, as well as the ability to ship internationally at a fraction of the cost it used to years ago. This business idea specifically relates to selling cultural items from India.

Customers: People living in Foreign Countries like USA, UK

Revenue Generation: Directly earning money by selling these items

5.

Idea: Cheap Home Solar Energy Setup Company

There is a large opportunity for residents in India to generate their own power and save money. For this idea, you would buy and setup solar equipment for people to install on their roofs or balconies since apartment living is popular.

Customers: Middle-Income People Living in India

Revenue Generation: Directly earning money on installation and maintenance of the solar panels
